

# ATTABOT™ BIN SPEC SHEET

## KEY FEATURES

- » Material specs include polypropylene, glass and talc reinforced
- » Ultra-lean, modular design with fewer moving parts allows for further flexibility and forward compatibility
- » Fewer moving parts also allows for ease-of-use enabling fewer maintenance requests
- » Multiple configuration options for all bin sizes creates space dynamics for most products
- » Able to operate in multiple temperature zones
- » Weave software controls the weight distribution of the bins by using the dimensions of the items that are stored in the structure

## TECHNICAL SPECIFICATIONS

### 2 BIN TYPES AVAILABLE

Outer dimensions (l x b x h)	Medium Tall	614 x 614 x 275mm 614 x 614 x 435mm
Interior dimensions (l x b x h)	Medium Tall	571 x 571 x 249mm 571 x 571 x 405mm
Empty weight		Approx. 5.3kg (medium)
Maximum payload		45kg (including bin)
Material		Polypropylene, UNIPOL 2135
Percent of drainage		~44%
Dividers		Multiple configurations possible with removable dividers. Up to 16 compartments per bin
